

# What is YouthInGovernment.com?

The GCCE curriculum resources are on-line and comprehensive courses, designed to support middle school social studies instruction.

Students in 6th and 7th grade will have opportunities to explore countries around the world as they examine the geography, people, environment, and government of each country. They are encouraged to identify unique strengths, weaknesses, and potential issues from each country then, learn how to write a resolution, and be prepared to participate in a Model United Nations.

8th grade students will explore the Georgia Standards of Excellence civics/government content standards that guide students through local, state, and federal government. Students will learn the legislative process, the parts of a bill, and be prepared to participate in a Model General Assembly.

The screenshot shows the Youth In Government website. At the top left is the logo with the text "Youth In Government". Below it is the title "Helping Georgia Students Understand Government" and a "SEARCH BY CLASS >" button. The main content area features three columns for "6th Grade", "7th Grade", and "8th Grade". Each column includes a map of the United States, a blue passport book, and a white label with the grade level. The 8th Grade column also features a blue circular seal with the text "STATE OF GEORGIA".
